

We had the opportunity to make a Tagxedo in the shape of a hand(Unique Kidz logo)because of the fundraising and our relationship together. Unique kids means a lot to our school and inspires us to learn more about how they live their lives.

The words we put into the Tagxedo were about our school and their holiday club for less able children. We thought about the words we were going to use and how we made them jump out. After thinking about this very seriously, we went on to draw around a hand. After we did that, one by one we added the words in different sizes and colours, thinking about what they mean to our school and Unique Kidz.

We hope that Unique Kidz will realise that we would love to do more with them and show how much we care about them.
